INTEROFFICE CORRESPONDENCE

DATE: January 16, 1991 DLS-91.3

TO: D. L. Shear, Remediation Programs Division, T130B, X5976

FROM: R. W. Hawes, Clean Water Division, T130B, X2582

SUBJECT: AUTHORIZATION OF PIPELINE INSTALLATION FOR OPERABLE UNIT NO. 2 SURFACE WATER TREATMENT PROJECT

I hereby authorize installation of influent and effluent pipelines through an existing culvert for the Operable Unit No. 2 Surface Water Treatment facility. The pipelines will extend from a Granular Activated Carbon (GAC) unit in the Rocky Flats buffer zone to the intake and discharge points in South Walnut Creek. It is intended that the pipelines will pass through the culvert shown in the attached map and be placed in the concrete drainage ditch leading to the creek.

A handwritten signature of Ralph W. Hawes in cursive script.

Ralph W. Hawes
Deputy Buffer Zone Manager
